Certified Trainer for the Olweus Bullying Prevention Program
The mission of the Center for Safe Schools is to provide schools with resources, training and technical assistance to create and maintain safe, productive learning environments.
Essential Questions

- What is bullying?
- How big of a problem can bullying be? Isn’t it just something everyone lives through?
- How does bullying affect relationships?
- Why is bullying prevention important?
- What can be done?
Activity

• Ice Breaker – 5 minutes
A student is being bullied when he or she is targeted, repeatedly and over time, to negative actions on the part of one or more students.
Three components of bullying

• It involves an intentional negative behavior.
• It typically involves a pattern of behavior repeated over time.
• It involves an imbalance of power or strength, which can be real or perceived.
What is/isn’t bullying?

Myth
Bullying is the same thing as conflict.

Reality
Conflict involves antagonism among 2+ people. *Any* two people can have a conflict. Bullying only occurs where there is a *power imbalance*.

Many children are involved in bullying situations, and most are quite concerned about it.
There are similarities and differences among boys and girls in their experiences of bullying.
Key findings about bullying (cont.)

**Similarities**
- Boys and girls engage in frequent verbal bullying.
- Boys and girls engage in relational bullying.

**Differences**
- Most studies: boys bully more than girls.
- Boys are more likely to be physically bullied.
- Girls are more likely to be bullied through social exclusion, rumor-spreading, cyberbullying and sexual comments.
- Boys are bullied primarily by boys; girls are bullied by boys and girls.
Bullying is more common among elementary and middle school children than high school youth.

Victimization Rates
Nansel et al. (2001)
Cyberbullying is another modality for bullying that has some unique characteristics.
Bullying can seriously affect children who are targeted.
Children who are bullied are more likely to:

- Want to avoid going to school.
- Have higher absenteeism rates.
- Say they dislike school; receive lower grades.
- Have health consequences, e.g. headache, sleep disturbances, depression, tense, anxiety, feeling unhappy.

Center for Safe Schools
Bullying and Suicide

There is **no causal link** between bullying and suicide.

However...

There **are direct links** between:

- bullying and depression;
- depression and suicide
Children who bully are more likely to be engaged in other antisocial, violent or troubling behavior.
Longitudinal study of children who bullied others

- 60% of boys who were bullies in middle school had 1+ conviction by age 24
- 40% had 3+ convictions
- “Bullies” were 4 times as likely as peers to have multiple convictions
Key findings about bullying #7

There is no single “profile” of a child who bullies or a child who is bullied … they share some common characteristics.
“Passive victims” tend to:

- Be quiet, cautious and sensitive
- Lack confidence
- Be physically weaker than peers (boys)
- Physically mature earlier (girls)
- Be afraid of getting hurt
- Find it easier to associate with adults than with peers
Common characteristics of bully/victims:

• Hyperactive, have difficulty concentrating
• Quick-tempered, try to fight back if provoked
• May be bullied by many children
• May be disliked by the adults in their environment
• Try to bully younger, weaker children
Children who bully tend to:

- Have more positive attitudes toward violence than peers
- Have quick tempers, be easily frustrated
- Have difficulty conforming to rules
- Be stronger than peers (boys)
- Show little compassion for victims
- Be aggressive to adults
Children who bully

Myth
Children who bully are outcasts or loners with few social skills.

Reality
Children who bully are not socially isolated. Usually they have peers who support them.
Bullying can occur anywhere — even where adults are present.
Key findings about bullying #9

Many children don’t report bullying experiences to adults.
Adults are not as responsive to bullying as we think we are, and as children want us to be.  

Adults overestimate their effectiveness in identifying bullying and intervening.  

- 70% of teachers believed that adults intervene almost all the time  
- 25% of students agreed (Charach et al., 1995)
Bullying is best understood as a group phenomenon in which children may play a variety of roles.
What roles do students play in bullying situations?

- **A**: Start the bullying and take an active part.
- **B**: Take an active part, but do not start the bullying.
- **C**: Support the bullying, but do not take an active part.
- **D**: Like the bullying, but do not display open support.
- **E**: Disengaged onlookers.
- **F**: Possible defenders.
- **G**: Dislike the bullying, help or try to help the bullied student.
- **H**: Student who is being bullied.

©2014 Olweus Bullying Prevention Program, U.S. www.clemson.edu/olweus
Peer attitudes toward bullying

• Most children have sympathy for bullied children.
  – 80% of middle school students “felt sorry” for victims of bullying (Unnever & Cornell, 2003)

• But, sympathy does not always translate into action.
  – 64% said that other students try to prevent bullying only “once in a while” or “never”
Effects on bystanders

- Feel afraid
- Feel powerless to change things
- Feel guilty
- Feel diminished empathy for victims
Bystanders can make a difference

- Brainstorm a range of helpful bystander responses.
- Discuss potential outcomes to different responses and identify a positive action you are willing to try.
What to do: Address fear bystander continuum of courage

Fried & Fried, 1996

1. Don't support the bully
2. Choose not to repeat the gossip
3. Support the victim in private
4. Alert an adult
5. Talk to the bully privately
6. Support the victim in the presence of the bully
7. Confront the bully
I swore never to be silent whenever and wherever human beings endure suffering and humiliation.

We must always take sides.

Neutrality helps the oppressor, never the victim. Silence encourages the tormentor, never the tormented.

Elie Wiesel
Bottom line

• If bullying was something that children could handle their own, the behavior wouldn’t occur.

• Children need adults to help them with bullying if they are the bully, the target, or the bystander.

• Bystander behavior change is the strongest impetus for change in school climate, so help your students become change agents in their school.
Activity

LEFT OUT – 10 minutes
What are the basic needs we have as human beings?

- Acceptance
- Belonging
- Control
- Meaningful Existence
Factors that impact connectedness

- academic engagement
- belonging
- discipline/fairness
- extracurricular activities
- likes school
- student voice
- peer relations
- safety and teacher/caregiver support
How do we provide positive ways for our children to fulfill their needs?

• Provide a safe environment and reinforce what is okay.
• Help our children build positive relationships with peers and adults.
• Give them creative and expressive opportunities such as music, art, and sports.
• Foster positive youth development and engage them in building a climate of support: bystander responses, perspective taking, empathy and solutions oriented.
• Parents and schools proactively and responsively communicating information.
• Being a role model for our children.
What adult responses do children find most helpful?

Findings from the Youth Voice Project:
• Listen to me
• Give advice – TALK to me
• Check in with me
• Increase supervision
• Meet with students involved separately
Adults are important

- Research indicates that when a child feels a bond with a supportive adult network, they are more likely to be more resilient, engage in school or activities, feel that they matter and feel safe.
Create a climate that supports

- Make expectations clear.
- Monitor the environment and document all incidents.
- Identify child and parent concerns.
- Train staff to prevent, intervene and address inappropriate behaviors.
- Develop methods and activities that are supportive and build positive relationships.
To Prevent Youth Violence

- Hate Crimes, Murder, Genocide
- Arson, Gangs, Weapons
- Drinking, Drugs
- Fighting, Stealing, Vandalism
- Bullying, Harassment
- Put Downs, Insults, Name-Calling
